

# Issues with radon compensation

Julian Dean, NPL

ARMUG meeting, 13<sup>th</sup> November 2008

# Summary of issues from earlier meetings

- **Users sometimes uncertain what method is in place**
- **No UK facility for alpha particulates for testing monitors**
- **Standard test verification methods would be useful for the manufacturers**
- **Measurement problems arising from low alpha DACs**
- **Calculation of uncertainties**
- **Difficult to monitor some areas (e.g. waste stores)**
