MTDATA References from Outside NPL

The following are references by non-NPL authors to work involving MTDATA or other work that may be of interest.

Tailoring of Ostwald ripening behaviour in multicomponent Al alloys.

Precipitation of M23C6 carbides: thermoelectric power measurements.

Simulation of the columnar-to-equiaxed transition in directionally solidified Al-Cu alloys.

Microstructural characterization of autogenous laser welds on 316L stainless steel using EBSD and EDS.

An accurate semi-empirical equation for sputtering yields I: for argon ions

Disagglomeration in thixoformed wrought aluminium alloy 2014.

Copper and Chromium Electrodialytic Migration in CCA-Treated Timber Waste

Formation of eutectic intermetallic rosettes by entrapment of liquid droplets during cellular columnar growth.

Morphology changes in solder joints--experimental evidence and physical understanding.

Transmission electron microscopy of high pressure metal dusted 316 stainless steel
Dissolution behavior of alumina micro-particles in CaO-SiO2-Al2O3 liquid oxide

Proposal of an empirical formula for the austenitising temperature.

Formation of nanostructured steels by phase transformation.

Design of new Fe-9CrWV reduced-activation martensitic steels for creep properties at 650 °C

The effect of the size distribution of inoculant particles on as-cast grain size in aluminium alloys.

A nonlocal diffuse interface model for microstructure evolution of tin-lead solder

The Role of Inclusions and Austenite Grain Size on Intragranular Nucleation of Ferrite in Medium Carbon Microalloyed Steels.

A concise model for mixed-mode phase transformations in the solid state.

Nucleation theory for high-carbon bainite.

Growth-restriction effects in grain refinement of aluminium.
Quested, T E; Greer, A L, Light Metals 2003 as held at the 132nd TMS Annual Meeting; San Diego, CA; USA; 2-6 Mar. 2003. pp. 945-952. 2003

Optimization of methods of complex alloy additions development for welding materials and manufacture.

The impact of silica to a SiO2-MgO-FeOx slag.
Ferrite/pearlite band formation in hot rolled medium carbon steel.
Offerman, S E; Van Dijk, N H; Rekveldt, M T; Sietsma, J; Van Der Zwaag, S, Materials Science and Technology. Vol. 18, no. 3, pp. 297-303. Mar. 2002

In-situ high-temperature x-ray diffraction on the gamma -> alpha transformation in low-carbon steels.

Investigation of the wetting characteristics of chromium based active braze alloys on silicon nitride.

Some aspects of Ni behaviour in PWR primary coolant.
Nuclear Energy, S. Dickinson, J. Henshaw, HE Sims and K. Garbett, 2001, 40, No. 1, Feb., 47-51,

Modelling and experimental verification of minor phase composition changes in creep resistant 12CrMoVNb steels.

The use of inclusion analyses in the development of clean steels.
Dyson, D J; Rose, A J; Whitwood, M M; Wilcox, D P, Clean Steel 5: Fifth International Conference on Clean Steel, Vol. 2; Balatonfured; Hungary; 2-4 June 1997. pp. 68-78. 1997

Comparison of observed and predicted equilibrium PAH concentrations in coke oven emissions - I. Relative abundances of carbon-hydrogen PAH
Thompson, D. Chemosphere 1997 Vol 35; Number 3, page(s) 597-606

Purification of remelted aluminum packagings.
Nijhof, G H; van der Donk, H M; Castelijns, C A M; Bouvet, S; Bertaud, Y, Light Metals 1996; Anaheim, California; USA; 4-8 Feb. 1996. pp. 1065-1069. 1996

Solidification of austenitic stainless steels.

Reactions of Aluminium and Silicon in MgO-Graphite Composites and Prediction of Phase Constitution using MTDATA

Thermodynamic calculations for the growth of alumina by directed melt oxidation

Phase Equilibria Predictions by Computational Calculations on Portland Cement Clinker
Thermoelectric power studies on a martensitic stainless steel

Fate of trace contaminants from biomass fuels in gasification systems

Gas turbines: Gas Cleaning Requirements for Biomass-Fired Systems

Investigations of the structure and stability of alternative gate dielectrics

Formation of chromium borides in quenched modified 310 austenitic stainless steel

Thermodynamic and Kinetic Behaviour of Materials in Micro Joints Formed with Sn-Pb and Pb free Solders

Development of Hard Bainite

Design of creep-resistant steels: success and failure of models

Sensitisation and Evolution of Chromium-depleted Zones in Fe-Cr-Ni-C systems

Modelling simultaneous precipitation reactions in austenitic stainless steels

Neural network model of creep strength of austenitic stainless steels

Die attach solder design Calculation of phase diagrams for lead-free power IC die attach

A Critical Comparison of LTE vs. Kinetic Approaches in the Modeling of Lamp Chemistry
Keer-Rendon, A. Powell, N. Wilson, G. Devonshire, R. International Symposium on
Theoretical design of ferritic creep resistant steels using neural network, kinetic, and thermodynamic models

Stability of retained austenite in TRIP-assisted steels

Constitutive Modelling of Metastable Steels

A Model for Ferrite/Pearlite Band Formation and Prevention in Steels

Acceleration of Low-temperature Bainite

Modelling and characterisation of Mo₂C precipitation and cementite dissolution during tempering of Fe -C-Mo martensitic steel
S. Yamasaki and H. K. D. H. Bhadeshia, Material Science and Technology, 2003, 19, 723

Modelling and characterisation of V₄C₃ precipitation and cementite dissolution during tempering of Fe -C-V martensitic steel
S. Yamasaki and H. K. D. H. Bhadeshia, Material Science and Technology, 2003, 19, 1335

Silicon-Rich Bainitic Steel Welds

Model for the maximum fraction of retained austenite in austempered ductile cast iron

Modelling Simultaneous Alloy Carbide Sequence in Power Plant Steels

Modelling precipitation of niobium carbide in austenite: multicomponent diffusion, capillarity, and coarsening
N. Fujita and H. K. D. H. Bhadeshia, Materials Science and Technology, 2001, 17, 403
Estimation of the amount of retained austenite in austempered, ductile irons using neural networks

Freeze layers in smelting processes

The effects of Al and Si additions on the microstructures of precipitates in low carbon steels containing Sn

Compositional changes in minor phases present in 12CrMoVNb steels during thermal exposure at 550°C and 600°C
V. Vodarek and A. Strang, Materials Science and Technology, 2000, 16(10), 1207-1213

Modelling microstructural evolution and mechanical properties of austempered ductile iron

Effect of niobium and titanium on tin precipitation in Fe alloys
X. Li, A. Watson, R. Brydson, A. Jha and R. C. Cochrane, Materials Science and Technology, 1999, 15, (9), 1001-1008

Design of Creep-Resistant Steel Welds

Bayesian Neural Network Model for Austenite Formation in Steels

A computer modelling approach to predicting the long term thermal stability of Co-Pd magnetic multilayers

A phase-field model coupled with a thermodynamic database

Melting behaviour of oxide systems for heterogeneous transmutation of actinides. III. The system Am-Mg-O

Thermodynamic considerations in dibenzodioxin and dibenzofuran formation: Concentrations of chlorinated dioxins
Thompson D, Chemosphere, Dec 1994
An evaluation of the heat of formation of chlorinated dioxins and its application to isomer abundance predictions
Thompson D, Chemosphere, Dec 1994

Effects of thermal history and microstructure on phosphorus and manganese segregation at grain boundaries in C-Mn welds

Modeling the microstructure-mechanical property relationship for a 12Cr-2W-V-Mo-Ni power plant steel
Li, Q. Materials Science and Engineering A 2003 VOL 361; Number 1-2 , page(s) 385-391 Elsevier Science B.V., Amsterdam. 0921-5093

Coal blend combustion: fusibility ranking from mineral matter composition

Modelling the effects of alloying elements on precipitation in ferritic steels

Determination of liquid fraction during solidification of aluminium alloys using a single-pan scanning calorimeter

Phase-field simulation of semisolid metal processing under conditions of laminar and turbulent flow

Minor-phase composition changes in 12CrMoVNb steels during long-term exposure
Vodarek V, Strang A, Materials Chemistry and Physics, Aug 2003

Prediction of the distribution of trace elements between the product streams of the Prenflo gasifier and comparison...
Thompson D, Argent B B, Fuel, Mar 2002

In-situ study of pearlite nucleation and growth during isothermal austenite decomposition in nearly eutectoid steel

The origin of splitting phenomena in the martensitic transformation of stainless steels
Caballero F G, Alvarez L F, Capdevila, C., Garca de Andres, C., Scripta Materialia, Aug 2003

Cluster formation of pearlite colonies during the austenite/pearlite phase transformation in eutectoid steel
The effect of coarse second-phase particles on the rate of grain refinement during severe deformation processing

Thermodynamic predictions of wrought alloy compositions amenable to semi-solid processing

Modelling of microstructural effects in the fatigue of austempered ductile iron

Quasi-peritectic solidification reactions in 6xxx series wrought Al alloys

Extension of the N-model to predict competing homogeneous and heterogeneous precipitation in Al-Sc alloys

Prediction of the effect of additives on slag resistance of Al$_2$O$_3$-SiO$_2$-SiC-C bond phases in air
Chan, C.-F., Argent, B.B., Lee, W.E., Calphad, Mar 2003

Characterisation of thin silica films deposited on carbon fibre by an atmospheric pressure non-equilibrium plasma...

Model for the maximum fraction of retained austenite in austempered ductile cast iron

Isothermal grain coarsening of spray formed alloys in the semi-solid state

Thermodynamic equilibrium study of trace element mobilisation under pulverised fuel combustion conditions
Thompson, D., Argent, B.B., Fuel, Feb 2002

The influence of nitrogen on the austenite/ferrite interface mobility in Fe-1at.%Si

The formation of diffusion coatings on some low-alloy steels and their high temperature oxidation behaviour: Part 1...
Jha, R., Haworth, C.W., Argent, B.B., Calphad, Dec 2001

The formation of diffusion coatings on some low-alloy steels and their high temperature oxidation behaviour: Part 2....
Jha, R., Haworth, C.W., Argent, B.B., Calphad, Dec 2001
Estimation of the amount of retained austenite in austempered ductile irons using neural networks

Computer modeling of the coarsening process in tin-lead solders
