NPL Water Rocket **EGGSTRA Challenge** 2012 Rules and Information

Date: Wednesday 20th June 2012

Venue: National Physical Laboratory, TW11 0LW

On the day we provide standard medium sized hens eggs, sealed in flimsy yet albumen-containing plastic bags for teams to attempt to fire and land intact.

Your egg-carrying vehicle must be powered in a similar way to mainstream competition rockets. It must be additional to rockets for the main challenge, and comply with the safety regulations of the overall competition.

You must indicate **prior to the day** an intention to participate in this **EGGSTRA Challenge** (so we can buy the eggs!).

Drop us an email headed **EGGSTRA Challenge** to waterrockets@npl.co.uk.

On the day, NPL will label your special rocket and give you a bagged/marked egg at the start of round three, which you must fire during this round. All **EGGSTRA Challenge** rockets will be collected by marshals and the success (or otherwise) investigated at the awards ceremony.

All participants in the **EGGSTRA Challenge** will obtain a certificate of success or failure. There are no special prizes for distance or timing associated with the **EGGSTRA Challenge** but merely gently hopping a couple of centimetres into the air to land nearby is playing a bit safe isn't it?! We hope participants in this challenge will demonstrate an element of showmanship.

Good luck!
