

Free Measurement Surgeries

Our recent customer survey estimated that NPL has directly helped organisations achieve benefits of £122 million per annum through good measurement practice

Are we helping you?

NPL users have made measurement improvements to:

- Introduce new or develop existing products and processes
- Improve accuracy of measurement
- Change calibration or traceability

Come to our Free Measurement Surgeries each Wednesday at our Huddersfield Laboratory.

Meet with NPL engineers to discuss:

- Measurement challenges
- Future measurement requirements
- Access to measurement expertise / equipment / facilities
- Interpretation of specifications
- Measurement strategies
- Measurement technology selection

The National Physical Laboratory is the UK's National Measurement Institute and an expert in applying cutting-edge measurement know-how to deliver business solutions. NPL Huddersfield specialises in dimensional inspection and measurement of complex components and assemblies, CMM programming, bespoke measurement training and measurement consultancy.
