To Whom It May Concern

Ipsos UK have been contracted to conduct a research study on behalf of the National Physical Laboratory (NPL).

This is an official study endorsed by the Department for Science, Innovation and Technology (DSIT) and funded through the National Quantum Technologies Programme (NQTP).

The study is designed to better understand how and why the support from NPL creates benefits for companies in the quantum technologies sector. This will also help develop qualitative evidence for the routes to impact of the NPL Quantum Programme.

Please note that this study falls under the public interest mandate.

I would like to thank you in advance for taking the time to provide valuable insight into the value of the NQTP.

Yours sincerely,

Maria Turner

Head of National Measurement System Programmes
International Research and Innovation Directorate
